

LIST OF FIGURES

Figure 1.	The Pamlico-Pungo river complex with sampling subareas	4
Figure 2.	Crab trawl blue crab landings and CPUE (catch/trip) for the Pamlico-Pungo river complex14
Figure 3.	Crab trawl flounder landings and CPUE (catch/trip) for the Pamlico-Pungo river complex15
Figure 4.	Length-frequencies of spot caught by crabs trawls in the Pamlico-Pungo rivers, November 1990-November 199122
Figure 5.	Length-frequencies of spot by trip caught in crab trawls using three-inch tailbags, in the Pamlico- Pungo rivers, November 1990-November 1991.23
Figure 6.	Length-frequencies of Atlantic croaker caught by crab trawls in the Pamlico-Pungo rivers, November 1990- November 199124
Figure 7.	Length-frequencies of southern flounder caught by crab trawls in the Pamlico-Pungo rivers, November 1990- November 199129
Figure 8.	Length-frequencies showing spatial and gear comparisons for southern flounder captured by crab trawls in November 1990 in the Pamlico-Pungo rivers30
Figure 9.	Length-frequencies showing spatial and gear comparisons for southern flounder captured by crab trawls in February 1991 in the Pamlico-Pungo rivers31
Figure 10.	Sex ratios by gear for blue crabs captured in crab trawls in the Pamlico-Pungo rivers, November 1990- November 1991.35
Figure 11.	Monthly sex ratios for blue crabs captured in crab trawls in the Pamlico-Pungo rivers, November 1990- November 1991.36
Figure 12.	Areal and temporal differences of sex ratios for blue crabs captured by crab trawls in the Pamlico-Pungo rivers. . .	.37
Figure 13.	Length-frequencies for blue crabs captured in crab trawls in the Pamlico-Pungo rivers, November 1990- November 1991. For females, histograms are additive, with striped = immature and solid = mature crabs39
